

DataTrans WebEDI

If you have used e-mail, you can easily process EDI messages through the DataTrans WebEDI solution. Everything within the system is based on intuitive web forms that look like standard business documents, such as purchase orders and invoices. There is no need to invest in hardware or software, all you need is an internet connection and WebEDI, and you're ready to transact EDI with your trading partners.

With our latest enhancements, WebEDI is even easier to use and has more features than ever. Improved navigation, user friendly interface, and faster trading partner setup has made DataTrans WebEDI 3.0 the choice for companies in need of a simple and comprehensive web-based EDI solution.

Electronic Data Interchange (EDI) has been in use within major corporations for decades as a method of improving efficiency in business processes by creating a link between computer systems of different companies and entities. This "data bridge", which allows disparate systems to communicate, utilizes a complex infrastructure of hardware, software, and communications protocols to make EDI communications possible. Our WebEDI solution takes this process, simplifies it, speeds up the implementation and makes it affordable for most any organization to use.

Internet Accessibility = EDI capability

EDI Management Made Simple

- ✓ No EDI experience or training required
- ✓ Accessible from any browser, including Safari, Firefox, Internet Explorer, etc.
- ✓ Integrated UCC-128 barcode shipping labels
- ✓ Access your EDI data from any location
- ✓ Low upfront and on-going EDI pricing
- ✓ Cost savings- elimination of redundant keying of data
- ✓ Simple intuitive user interface
- ✓ Connect to all your Trading Partners through one simple web-based solution.
- ✓ No software or hardware to purchase
- ✓ Simple, affordable, straight forward pricing
- ✓ Increased productivity over faxing and other processes
- ✓ The only requirement is access to the Internet

WebEDI's Intuitive User Interface. Makes EDI as Easy as E-mail

One look at the intuitive user interface and it's easy to see and understand how to process EDI messages using DataTrans WebEDI. All of the relevant information needed to recognize and process the messages is shown in columns that can be sorted.

Quickly view and respond to new inbound EDI messages from WebEDI's Inbox.

You can also quickly see the status of messages and the responses that have been sent. DataTrans Document Association links related messages, giving you a business process tool to ensure that the appropriate responses have been sent for all inbound messages.

Simple to Use

Our intuitive user interface keeps navigation simple and easy for anyone to learn. The appearance of WebEDI is similar to email with folders for message categories such as Inbox, Drafts, Sent, etc.

The screenshot shows the DataTrans WebEDI interface. At the top, it says "The Powerful and Intuitive EDI Management Solution". Below that is a search bar and a "Log Out" button. On the left is a navigation menu with folders like "Inbox (1)", "Draft", "Sent", "Smart Folders", "Archive", "Add-Ons", "Catalog", "Inventory", and "Reports". The main area displays a table of messages with columns: Msg ID, Type, Trading Partner, Reference, Received Date, Shipment Date, Total, and Status. One message is selected, and its details are shown below. The details include ISA Control, Sent Date, Last Modified Date, and Associated Documents. The main content area shows the "Invoice (810)" for "BED BATH & BEYOND" with Message ID 1242367 and Reference # 1295. Below this are sections for "Document Information", "Invoice Information", "Reference Information", and "Address Information".

Msg ID	Type	Trading Partner	Reference	Received Date	Shipment Date	Total	Status
1240503	850 (PO)	Frys Electronics	14270273	09/01/2009 10:39 AM CT	00/00/0000	432.00	Responded
1240294	852 (Act)	Academy Sports		08/26/2009 10:56 AM CT	00/00/0000	0.00	Read
1237465	850 (PO)	Bed Bath & Beyond	ABC04833	08/13/2009 11:33 AM CT	08/20/2009	150.00	Responded
1237464	850 (PO)	Bed Bath & Beyond	ABC69416	08/13/2009 11:33 AM CT	08/17/2009	150.00	Read
1237525	856 (ASN)	Bed Bath & Beyond		00/00/0000 12:00:00 AM	00/00/0000	0.00	Read
1242367	810 (Invoice)	Bed Bath & Beyond	1295	00/00/0000 12:00:00 AM	00/00/0000	150.00	Read
1237463	850 (PO)	Target (Dev)	0275	08/13/2009 11:31 AM CT	10/04/2009	3014.52	Unread
1237329	850 (PO)	Team Alliance	4502259812	08/12/2009 08:51 AM CT	09/19/2009	416.00	Read
1237314	850 (PO)	Team Alliance	4501958248	08/12/2009 08:50 AM CT	09/26/2009	82.20	Read

Document Associations show all related documents. For example, it's easy to see the invoices and ASN's associated with a PO in the Inbox.

[-]	1237464	850 (PO)	Bed Bath & Beyond	ABC69416
[...]	1237525	856 (ASN)	Bed Bath & Beyond	
[...]	1242367	810 (Invoice)	Bed Bath & Beyond	1295

Efficiently Generate Responses

There is little or no **re-keying** when generating responses to incoming documents because data is carried over from the original document. In addition, you can setup default values in forms that have consistent fields.

Purchase Order

USA Control #: 50001221 Group Control #: 1228

 Missing required Pack Color

Avoid Chargebacks and Other Costly Errors

Intelligent form validation helps to ensure the data sent to your trading partners is acceptable according to their requirements and guidelines. In the event that required data is missing or certain information is entered in an inappropriate format, WebEDI will provide notes flagging the mistake(s) and how to correct the issues.

Getting Organized

Smart Folders allow you to sort EDI messages by criteria that you define such as sort by trading partner, type of EDI message, etc. Thus, your EDI messages can be organized to best suit your preferences or business processes.

Smart Folder

Name: Pending

Match any of the following rules for inbound/outbound documents.

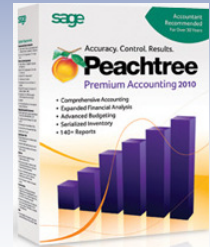

Shipment Date is this month

Options: Delete, Add, Cancel, Save

Integrate into Your Accounting or Other System

WebEDI is also unique in the fact that you can set up integration into certain applications. You can download EDI data as CSV files. With the optional Integration package, you can also integrate WebEDI to tie into QuickBooks or Peachtree. WebEDI gives companies the best of both worlds - an intuitive simple EDI tool to manage the EDI process and the ability to integrate with accounting systems.

WebEDI Features

- One console for all Trading Partners
- Only requirement: access to the Internet
- Generate inventory and sales reports for your Trading Partners
- Generate UCC-128 Barcode Labels as part of the ASN process
- Intuitive document association keeps transactions organized
- Automatic e-mail alerts on new orders or other inbound messages
- 128-bit SSL encryption and private network security
- Calendar tracking feature
- Intelligent form validation
- Integration with accounting software and CSV downloads
- Smart Folders keep specified document types organized
- Built In reporting

WebEDI Benefits

- Low upfront and ongoing EDI costs
- Fast setup and intuitive interface allows you to begin exchanging EDI almost immediately
- Quickly connect to DataTrans' network of hundreds of Trading Partners
- No software to purchase
- Consistent interface, regardless of trading partner requirements
- Responsive U.S. based support team
- Reliability: fully redundant architecture eliminates interruptions
- Set user permissions to securely administer product to multiple users
- No training or extra technical staff required
- Numerous features designed to keep you in compliance with Trading Partners' guidelines

WebEDI: The simple solution to make everyone EDI capable

Since WebEDI is accessible through the Internet, any company can now become EDI capable in a short period of time with no new system requirements. All that is necessary is access to the Internet through a common web browser. DataTrans WebEDI is **simple, secure, intuitive and reliable**. Take advantage of this new e-Commerce technology and do away with the inefficient paper and manual methods of communicating with your partners. Contact DataTrans today to begin exchanging EDI messages with your customers and other trading partners.
